Brushing away all the excuses and subjectfuges offered by the defendants, the country knows that its treasury was relibed by the most geveral milions of dollars, and it knows ex-actly how it was done. Every step has been robbers had their agents in all the country, who "worked up" the the which increase of pay was based. materials on which increase of payment.

They right took contracts at fraudulently law figures, and thus crowded out honest bidders. Then, through their agents in various parts of "petitions," more or loss frandulent in their character, were gottan up on which the postoffice department, under Brady a management, granted enormous increase of pay, though in many cases the service was performed. For example, stating on egon routes with bids amounting to \$22,582, the ring got the figures raised to \$149ny upon the recent trials showed, the pay was very much as before. Dorsey and the rest had ir agents at work in the whole field covered by their operations. For one of them, who was employed in Oregon, Dorsey drew up with his own land a form of "petition" to waigh signatures were to be solicited tasking for ine; and fearing that his purposes would n wearried out intelligently, he appended the admonition, 'of course you want the worthing of each petition; as well as the hand writing of the papers would not show on the files of that and to be the fraudulent things tory actually were. It is he strong about of the conspiracy at Washington that makes it so difficult bring the robbest to punishment.

THE DEMOCRATIC PUZZLE.

Already there is an active contact in the democratic party over the speakership of the next busy. It is an important matter, be-cause the result of it will shape legislation and so have a bearing of no little rignificance on the next presidential election. The contest lies between Randshi of Pennsy vanis, ex-speakes, and Carlisle of Kentnesy. These gentlemen reprusent two very diverso elements in the democratic ranks. It is this that gives importance to the conject butween them; in which lemocratic polit cians and newspaers in all parts of the country are rapidly person all parts of the country and require taking sides. Mr. Cardisle represents the free-trade section of the party. Formerly this was this party, but latterly the protectionists have gained a lodgment within the democratic ranks, and so strong have they become the they have shown thomselves able to dictate the policy of the party for the last six or eight years. They had Randall for speaker on long as the house was under democratic dented, and now that the house is to be democratic again, they are once more pushing lain for the mostrion. The contest between Bandall and Carlisje therefore has all the significance of a struggle in the party for control of list policy on the great causing question upon which it is to make its record for 1984. It is a situation full of difficulty. If the party shealed industri to its pld traditions and pronounce for fire trades would be the multitude of protection. ists who now adhere to it. She all it declar, for protection it would discust these who look to it to become the agent of tariff refore; and besides, it is very doubtful whether, as a protection party, it could make any li dway against the republican, who will against critical claim to all the glory that can be derived from champio whip of protection. It is certain that the democratic party will have refinite
